

Environmental Policy Statement

Environmental Management forms part of our Integrated Management System which conforms to ISO 9001:2015 (Quality Management) and ISO 45001:2018 (Health & Safety) as well as ISO 14001:2015.

The company understands the potential environmental impacts that our works could have and therefore ensure that appropriate robust systems of control are utilized to reduce these risks and eliminate them whenever it is reasonably practicable to do so.

We comply with all applicable and current legislation, client and stakeholder requirements and are fully committed to meet or exceed all our compliance obligations relating to the companies activities.

The management and all who work at RI are committed to the care of the environment and the prevention of pollution.

We have clear targets to reduce our consumption of natural resources and reduce and minimise waste by the introduction of a site wide war on waste policy and by the adoption of environmental best-practice across the company. We work closely with all our suppliers in a bid to reduce harmful emissions and waste.

An essential feature of the environmental management system is a commitment to continual improvement of environmental performance. This is achieved by setting annual environmental improvement objectives and targets which are regularly monitored and reviewed. The objectives and targets are publicised throughout the organisation and all staff are committed to their achievement.

In order to ensure the achievement of the above commitments, the organisation has implemented an environmental management system which satisfies the requirements of ISO 14001:2015.

This Policy and the obligations and responsibilities required by the environmental management system will be communicated to all employees and contractors working on behalf of the organisation.

This Policy is available to all interested parties on request, and will be reviewed periodically to ensure its continuing suitability.
